Call Center

Transform your customer service through our Call Center Solution that is quick to deploy and simple to use. Access powerful Agent and Supervisor capabilities to deliver great customer service with features like skills based routing, real time monitoring or pull in remote agents to support call volumes. Enjoy the benefits of centralized management to put critical information at your fingertips to make vital decisions about queueing, overflow treatment and call routing.

Call Recording

Call Recording is an extremely valuable tool to have in your service offering. Large call centers and enterprises have been recording calls for decades. Now more and more small and medium-sized businesses are realizing that Call Recording is affordable and valuable, no matter how large of a contact center you operate or how many seats you have providing customer support.
