TARIFF FORMAT

- A. Sheet Numbering: Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between pages 11 and 12 would be page 11.1.
- B. Sheet Revision Numbers: Revision numbers also appear in the upper right corner of each sheet where applicable. These numbers are used to indicate the most current page version on file with the Commission. For example, 4th Revised Sheet 13 cancels 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.
- C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).(1)
- D. Check Sheets: When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current Revision Number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on Commission file.

With LEC billing, the Customer's charges for Service(s) are billed with the Customer's bill for local service. If LEC billing is utilized, the rules and regulations applying to rendering and payment of the bill and late charges are the same as covered in the applicable LEC tariff. The Company will make every effort to post any credit due to the Customer account(s) on the Customer's next LEC bill. However, based on the date of the resolution of a dispute and the date credits must be provided to the LEC, it may be two or more billing cycles before a credit will be issued. The Company's name and toll-free telephone number will appear on the Customer's bill.
- 2.10.5 Reserved for future use.
- 2.10.6 If the Customer chooses to pay by credit card, the Customer agrees to the rules governing that payment option, including applicable limits on the amount of Service that may be used before making a payment. No additional notice or consent is required before the Company invoices your credit card or debits the account for all amounts due to the Company. Customer will be notified of any limits that are imposed. If such limits are imposed, Customer may be required to pay for Service with a valid major credit card. The Company may stop offering this option at any time upon notice to the Customer. The Company reserves the right to authorize a credit card payment before the end of the billing cycle if the customer shows unusual use of service, including, without limitation, excessive use of service, abnormal calling patterns or high international termination.

SECTION 2 – RULES AND REGULATIONS (continued)

2.11 Taxes

All federal, state and local taxes, assessments, surcharges, or fees, including sales taxes, use taxes, gross receipts taxes, and municipal utilities taxes, are billed as separate line items and are not included in the rates quoted herein.

2.12 Late Charge

A late fee of the greater of \$5.95 or 1.5% monthly, will be charged on any past due balances for business Customers only.

2.13 Returned Check Charge

A fee of \$25 will be charged whenever a check or draft presented for payment for service is not accepted by the institution on which it is written.

2.14 Reconnection Charge

A reconnection fee of fifty dollars (\$50.00) per occurrence will be charged when service is reestablished for Customers, which have been disconnected due to non-payment. Payment of the reconnection fee and any other outstanding amounts will be due in full prior to reconnection of service.

(l)

SECTION 3 – DESCRIPTION OF SERVICE**3.1 Computation of Charges**

3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and/or time of day of the call. The variable measured charge is specified as a rate per minute, which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. For all calls, fractions of an increment are rounded up to the next whole increment. For example, a call with a one (1) minute increment lasting 35 seconds will be rounded to one (1) minute. Calls with charges that include a fraction of a cent .5 or greater will be rounded to the next highest cent. For example, a Customer making a call with a computed charge of \$1.434 will be charged \$1.43 and a Customer making a call with a computed charge of \$1.435 will be charged \$1.44.

3.1.2 Where mileage bands appear in a rate table, rates for all calls are based upon the airline distance between the originating and terminating points of the call, as determined by the vertical and horizontal coordinates associated with the exchange (the area code and three digit central office code) associated with the originating and terminating telephone numbers. If the Customer obtains access to the Company's network by a dedicated access circuit, that circuit will be assigned an exchange for rating purposes based upon the Customer's main telephone number at the location where the dedicated access circuit terminates. The vertical and horizontal (V & H) coordinates for each exchange and the airline distance between them will be determined according to industry standards.

Formula:

$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$

SECTION 3 – DESCRIPTION OF SERVICE (continued)

3.1.3 Timing begins when the called station is answered and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. Recognition of answer supervision is the responsibility of the Underlying Carrier. Timing for each call ends when either party hangs up. The Company will not bill for uncompleted calls.

3.1.4 If the Customer uses a calling plan with a monthly recurring charge, that monthly charge is charged for every billing or calendar month in which a customer uses the service as defined by placing a call from a working telephone number.

3.2 Customer Complaints and/or Billing Disputes

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

3340 W. Market St.
Akron, OH 44333
1-800-274-1015

Any objection to billed charges should be reported promptly to the Company. Adjustments to Customers' bills shall be made to the extent that records are available and/or circumstances exist which reasonably indicate that such charges are not in accordance with approved rates or that an adjustment may otherwise be appropriate. Where overbilling of a subscriber occurs, due either to Company or subscriber error, no liability exists which will require the Company to pay any interest, dividend or other compensation on the amount overbilled.

SECTION 3 – DESCRIPTION OF SERVICE (continued)**3.4 Service Offerings**

The Company's service offerings are designed for interstate and international calling. In order to receive the intrastate rates, Customers must subscribe to the federal/international plan as specified in the Company's interstate and international terms and/or service agreements and rate schedules.

3.4.1 Presubscribed 1+ Dialing

This service permits Customers to originate calls via switched or dedicated access lines, and to terminate intrastate calls. The customer dials "1+" followed by "ten digits". The customer is presubscribed to the Company's service for intraLATA and interLATA calling.

3.4.2 Casual Calling

This service permits Customers to originate calls via switched access lines, and to terminate intrastate calls via a 10XXX or 101XXXX Access Code. The Customer dials the Access Code followed by "1+ ten digits". This service is Non Primary Interexchange Carrier Service. Non Primary Interexchange Carrier Service is available to residences and businesses, except hospitals, payphones, hotels and in-mate only facilities, that demonstrate credit-worthiness.

3.4.3 Travel Cards

The Customer utilizes an 11 digit "toll-free" access number established by the Company to access a terminal. Upon receiving a voice prompt, the Customer uses push button dialing to enter an identification code assigned by the Company, and the ten digit number of the called party.

3.4.4 Toll-Free Service

This service is inbound calling only where an 800, 888 or other toll-free prefix number rings into a Customer's premise routed to a specific telephone number or terminated over a dedicated facility.

SECTION 3 – DESCRIPTION OF SERVICE (continued)

3.4.5 Prepaid Calling Cards

This service permits use of Prepaid Calling Cards for placing long distance calls. Customers may purchase Company Prepaid Calling Cards at a variety of retail outlets or through other distribution channels. Company Prepaid Calling Cards are available at a variety of face values ranging from five dollars (\$5.00), in one dollar (\$1.00) increments. Company Prepaid Calling Card service is accessed using the Company toll-free number printed on the card. The caller is prompted by an automated voice response system to enter his/her Authorization Code, and then to enter the terminating telephone number. The Company's processor tracks the call duration on a real time basis to determine the number of Telecom Units consumed. The total consumed Telecom Units and applicable taxes for each call are deducted from the remaining Telecom Unit balance on the Customer's Company Prepaid Calling Card.

All calls must be charged against Prepaid Calling Card that has a sufficient Telecom Unit balance. A Customer's call will be interrupted with an announcement when the balance is about to be depleted.

When the balance is depleted, the Customer can either call the toll-free number on the back of the Company Prepaid Calling Card and "recharge" the balance on the card using a nationally recognized credit card, or the Customer can throw the card away and purchase a new one. Calls in progress will be terminated by the Company if the balance on the Company Prepaid Calling Card is insufficient to continue the call.

A card will expire on the date indicated on the card, or if no date is specified, 6 months from the date of purchase, or the date of last recharge, whichever is later. The Company will not refund unused balances.

SECTION 3 – DESCRIPTION OF SERVICE (continued)

A credit allowance for Company Prepaid Calling Card Service is applicable to calls that are interrupted due to poor transmission, one way transmission, or involuntary disconnection of a call. To receive the proper credit, the Customer must notify the Company at the designated toll-free customer service number printed on the Company Prepaid Calling Card and furnish the called number, the trouble experienced (e.g. cut off, noisy circuit, etc.), and the approximate time that the call was placed.

When a call charged to a Company Prepaid Calling Card is interrupted due to cut off, one way transmission, or poor transmission conditions, the Customer will receive a credit equivalent of one Telecom Unit.

Credit allowances for calls pursuant to the Company Prepaid Card Service do not apply for interruptions not reported promptly to the Company or interruptions that are due to the failure of power, equipment or systems not provided by the Company.

Credit for failure of service shall be allowed only when such failure is caused by or occurs due to causes within the control of the Company.

The Company will block all calls beginning with the NPA "900" and NXX "976" calls, therefore such calls cannot be completed.

SECTION 3 – DESCRIPTION OF SERVICE (continued)

3.4.6 Directory Assistance.

Access to long distance directory assistance is obtained by dialing 1 + 555-1212 for listings within the originating area code and 1 + (area code) + 555-1212 for other listings. When more than one number is requested in a single call, a charge will apply for each number requested. A charge will be applicable for each number requested, whether or not the number is listed or published. Directory assistance is available to any Customer that has access to the directory assistance bureau of the DUC.

There is an allowance of ten direct-dialed calls for each residential or business customer per billing period without charge.

Directly dialed calls to directory assistance are exempt from rates and regulations when placed from:

- a. a single-line telephone exchange line of a handicapped user. Any line may be registered for exemption with the carrier in those instances where one of the users of the line is considered to be legally blind, or visually or physically handicapped as defined by the Federal Register, Vol. 35 # 126. Where a user's handicap prevents the dialing of a telephone in a conventional manner or permits only the dialing of "0", those calls placed from the registered line, and not directly dialed, will also be exempt; and
- b. exchange lines of the Commonwealth of Massachusetts and its political subdivisions.
- c. payphones.

Directory assistance calls for telephone numbers which are non-listed, or non-listed and non-published are exempt from the rate, and shall not be included in the ten-call allowance.

Customer-specific Pricing/Special Pricing Arrangements (CSP/SPA) are made in response to the specific, individual requirements of the customer, and/or a competitive bidding process. A CSP/SPA differs from the Company's standard or general tariffed offerings in that it contains a customer service arrangement and/or term and/or volume commitment. Because the CSP/SPA customer is not "under like circumstances" as other customers, the CSP/SPA arrangement complies and is consistent with the statutory and regulatory requirements set forth in Massachusetts General Laws, Chapter 159, and docket DPU 90-24.

3.4.8 Emergency Call Handling Procedures

Emergency "911" calls are not routed to company, but are completed through the local network at no charge.
