All such terminal equipment must be registered with the FCC under 47 C.F.R., Part 68 and all wiring must be installed and maintained in compliance with those regulations. The Company will, where practicable, notify the Customer that temporary discontinuance of the use of a service may be required; however, where prior notice is not practicable, nothing continued herein shall be deemed to impair the Company's right to discontinue forthwith the use of a service temporarily if such action is reasonable under the circumstances. In case of such temporary discontinuance, the Customer will be promptly notified and afforded the opportunity to correct the condition which gave rise to the temporary discontinuance. During such period of temporary discontinuance, credit allowance for service interruptions as set forth in Section 1.10 following is not applicable.

The Customer is responsible for ensuring that Customer-provided equipment connected to Company equipment and facilities is compatible with such equipment and facilities. The magnitude and character of the voltages and currents impressed on Company-provided equipment and wiring by the connection, operation, or maintenance of such equipment and wiring shall be such as not to cause damage to the Company-provided equipment and wiring or injury to the Company's employees or other persons. Any additional protective equipment required to prevent such damage or injury shall be provided by the Company at the Customer's expense.

Section 1 – Regulations

1.4.4 Interconnection of Facilities

Any special interface equipment necessary to achieve compatibility between the facilities and equipment of the Company used for furnishing local exchange service and the channels, facilities, or equipment of others may be provided at the Customer's expense.

The Company's services (as detailed in Section 2 of this Local Price Guide) may be connected to the services or facilities of other communications carriers only when authorized by, and in accordance with, the terms and conditions of the Local Price Guides of the other communications carriers which are applicable to such connections.

Facilities furnished under this Local Price Guide may be connected to Customer provided terminal equipment in accordance with the provisions of this Local Price Guide.

1.4.5 Inspections

Upon reasonable notification to the Customer, and at a reasonable time, the Company may make such tests and inspections as may be necessary to determine that the Customer is complying with the requirements set forth in Section 1.4.3 for the installation, operation, and maintenance of Customer-provided facilities and equipment to Company-owned facilities and equipment. No credit will be allowed for any interruptions occurring during such inspections.

If the protective requirements for Customer-provided equipment are not being complied with, the Company may take such action as it deems necessary to protect its facilities, equipment, and personnel. The Company will notify the Customer promptly if there is any need for further corrective action. Within ten days of receiving this notice the Customer must take this corrective action and notify the Company of the action taken. If the Customer fails to do this, the Company may take whatever additional action is deemed necessary, including the suspension of service, to protect the facilities, equipment and personnel from harm. The Company will, upon request 24 hours in advance, provide the Customer with a statement of technical parameters that the Customer's equipment must meet.

Section 1 – Regulations

1.5 Establishment of Service1.5.1 Application for Service

An application for service, whether made orally, in writing, or by action of the Customer (e.g., use of Company's services) establishes the contract between the Company and the Customer on the terms and conditions set forth in this Local Price Guide. 1.5.2 Minimum Contract Periods

1.5.2.1 Except as otherwise provided, the minimum contract period is one month for all services furnished. The Customer nonetheless shall be responsible for all monthly usage and installation charges incurred for the use of such service and equipment.

1.5.2.2 Except as provided in 1.5.2.1 preceding the length of minimum contract period for directory listings, and for joint user service where the listing actually appears in the directory, is the directory period. The directory period is from the day on which the directory is first distributed to the Customers to the day the succeeding directory is first distributed to Customers.

1.5.2.3 The Company may require a minimum contract period longer than one month at the same location in connection with special (non-standard) types or arrangements of equipment, or for unusual construction, necessary to meet special demands and involving extra costs.

Section 1 – Regulations

1.5.3 Cancellation of Application for Service Prior to Establishment of Service

1.5.3.2 Where installation of facilities, other than those provided by special construction, has been started prior to the cancellation, the lower of the following charge applies:

A. The total costs (including overheads) in connection with providing and removing such facilities.

B. The monthly charges for the entire initial contract period of the service ordered by the Customer as provided in this Local Price Guide plus the full amount of any installation and termination charges applicable.

Where one or more, but not all, of the services involved in the special construction are canceled, a charge equal to the cost (including overheads) incurred for the discontinued service applies.

Section 1 – Regulations

1.5.4 Establishing Credit

1.5.4.1 The Company, in order to assure the payment of its charges for service, will require applicants and Customers to establish and maintain acceptable credit.

1.5.4.2 The establishment or reestablishment of acceptable credit as provided in this Section shall not relieve the applicant or Customer from compliance with other provisions of this Local Price Guide as to advance payments and the payment of bills, and shall in no way modify the provisions regarding disconnection and termination of service for failure to pay bills due for service furnished.

1.5.4.3 Applicants for Service

The Company will require a cash deposit or other guarantee as a condition of new service for Residence service applicants, if an applicant has an unsatisfactory credit or service standing with the Company due to any of the following:

Section 1 – Regulations

- (4) The customer or applicant requests service at a residence in which he or she does not reside: or
- (5) The company has had 2 or more checks for the applicant or customer's account returned from a bank within the past 3 years for insufficient funds or no account, excluding, bank error; or

The Company will require a cash deposit or other guarantee as a condition of new service for Business service applicants, if an applicant has an unsatisfactory credit or service standing with the Company due to any of the reasons set forth above, or the applicant fails to meet the requirements of the Company's Business Credit Evaluation Plan.

Section 1 – Regulations

During the verification of an applicant's credit, the Company will permit service to be installed upon the prepayment by the applicant of an amount equal to applicable service charge and initial non-recurring charges applicable for service installation plus the estimated amount of the applicant's bill based upon one month's service. Such prepayment will be credited to the applicant's service account but does not relieve the applicant of his responsibility to subsequently establish satisfactory credit arrangements in accordance with this Section.

If credit is not established, the Company may disconnect the service not sooner than five days after delivery or eight days after mailing of written notice of intention to disconnect.

When a Customer's service has been disconnected in accordance with the above, service will not be reconnected until satisfactory credit arrangements have been made.

Section 1 – Regulations

(3) The Company has had 2 or more checks for the Customer's account returned from a bank within the last 3 years for insufficient funds or no account, excluding bank error.

B. Payment by the Customer of delinquent bills will not of itself relieve the Customer from the obligation of establishing his credit with respect to the account involved or with respect to any other account in connection with the same or any other class of service which the Company may be providing the Customer.

C. A customer may be required to reestablish credit in accordance with 1.5.4.3 when the amount of service furnished or the basis on which credit was formerly established has significantly changed.

If the Customer reports a service, facility or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

For calculation credit allowances, every month is considered to have 30 days. Only those facilities on the interrupted portion of the circuit will receive a credit. Service outages between 12 and 24 hours in duration shall receive a credit for 24 hours.
