

HIGHLIGHTS

UC Integrator is a cloud-based service that integrates with FirstComm’s hosted voice platform which provides integration for over 100 different CRM applications.

USER FEATURES

- Call Control— offers a full range of access to control inbound and outbound calls without touching the handset
- Caller Preview— allows the user to see who is calling before answering
- Screen Popping— a caller’s full details can be quickly “popped” on the screen, if their located in an integrated application
- Click to dial— dial with ease by clicking on numbers through any application on your computer.
